

## Northern Line Extension

### KENNINGTON STEP PLATE JUNCTION UPDATE

September 2017

#### Weekend Kennington Loop Works – Surface Works

Thank you for your patience whilst we continue construction of the Northern Line Extension (NLE) near you.

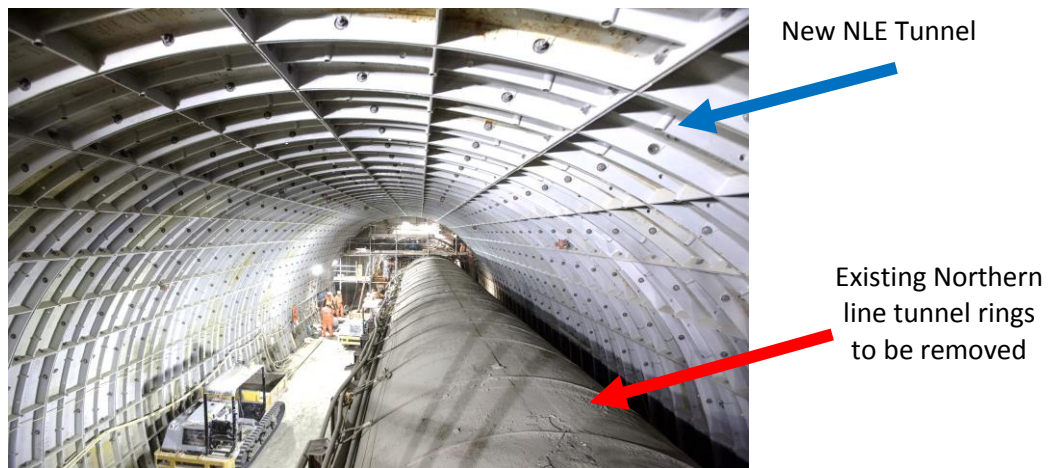

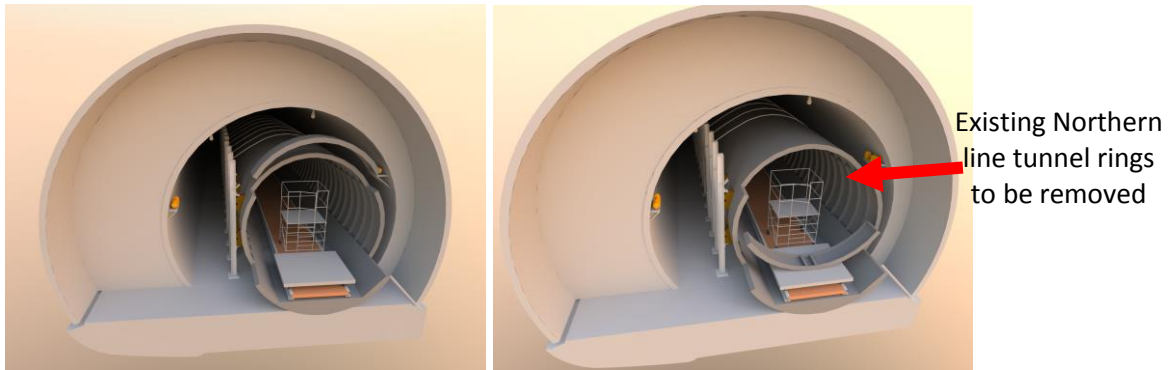

We recently wrote to you to advise of the **24/7** upcoming weekend work to remove the existing Northern line Kennington loop. Having completed the construction of the new connecting tunnels in Kennington we now need to remove the shell of the existing Northern line tunnel to connect with our new NLE tunnels. This notification provides more detail about the surface works taking place as part of this work in Kennington Green and Park.

Our teams will remove existing cast iron tunnel rings from the shell of the existing Northern line tunnel and remove them by road. This will be done individually to minimise noise and disruption. We do not expect this work to cause any significant disruption to residents on the surface. Once the rings have been removed from the tunnel they will be taken to the surface and placed into the yard to await offsite disposal which will take place between **08:00** to **20:00**. During this time, the doors of the shed will remain open. We endeavour not to work on the surface beyond **20:00** however there may be potential for this to occur.

These works will take place on the following dates:

- **15-18 September,**
- **29 September - 2 October**
- **10-13 November**

Construction will take place over a 52 hour period on each weekend, from Friday night to Monday morning. During this time the Northern line will continue to operate as normal, however with a reduced service of a train approximately every five minutes, on both branches. We will also need to temporarily close Kennington station during the Night Tube to allow staff to access the track. This will take place from approximately **00:45** until **01:30** on Friday 16 September, Friday 30 September and Friday 11 November.

Works will be monitored at all the times using the best practicable means of work.

We will be meeting local residents in advance of these works to discuss with them in more detail. Please get in touch if you would like us to arrange a visit in your property in advance.
