Data & Analytics Product Manager	The post holder is accountable for the end-to-end management of allocated TfL technology and data products (within a Data & Analytics product family) making all necessary provisions to meet the needs of their business area(s) and provide the required Technology & Data (T&D) capability to realise business outcomes. The Data & Analytics Product Manager supports the Data & Analytics Senior Product Manager in being the primary Data & Analytics department interface with their business area ensuring relationships are strategically managed and working with the wider T&D function to ensure all TfL stakeholders have a clear understanding of T&D product direction.	£55,000 - £59,999	N/A	NIL	N/A	0

Job Title	Job Purpose	Salary Range (FTE)	Contractual Adjustment	Benefit in Kind Range	Budget £m	No. Direct Reports (Pos)
Data & Analytics Senior Tester	The post holder will have responsibility for ensuring that technical data and analytics solutions, which include applications, reports, extracts and refunds, which have been designed and developed in Data & Analytics have been thoroughly unit, system and user acceptance tested in line with the published Data & Analytics test strategy.	£55,000 - £59,999	N/A	NIL	N/A	0
Data Analyst	The role holder will be responsible for providing analysis and insight that enables the Risk and Assurance Senior Leadership Team to make decisions based upon their option and recommendations on audit, risk and fraud data. The role holder turns data into information and intelligence, adding value to both the Risk and Assurance Leadership Team and the TFL Leadership Team and Committees, by providing relevant insights into business improvement. They are responsible for building business intelligence dashboards and reports, carrying out ad-hoc analysis. This involves applying their specialist technical knowledge and experience to autonomously manipulate data from the departments software systems via API to Microsoft tools.	£55,000 - £59,999	N/A	NIL	N/A	0
Data and Inspections Manager	This role is accountable for the day to day collection and management of AMD's operational asset and condition data, to support and enable the safe and reliable operation of the pan London network. This role will manage centralised and geographically remote teams, be responsible for budget, programme and performance of both in house and external service providers to best serve the inspection requirements for multiple assets with varying degrees of legal liability and business criticality.	£55,000 - £59,999	N/A	NIL	N/A	8
Data Architect	As part of the Analysis and Tasking Team, the Data Architect will be the lead technical expert, with responsibility for designing and implementing processes and systems to enable advanced data handling and storage in support of analysis. Accurate information, at the time it is needed, is critical for our operational resource to deliver the CPOS vision of safe, secure and reliable journeys. Experienced working in a changing technology environment you will design a plan to integrate, centralize, protect and maintain new and existing data and information used by the team. You will have a handle on how we store and retain information, understanding our risks through keeping a catalogue of our data, planning its collection and embedding best practice data processes within our systems. You will be expected to lead and promote CPOS' long term approach to data handling through your technical expertise and innovative approach, being a role model and inspiring those around you. This role will be an integral part of the CPOS Analysis and Tasking Team collaborating with other managers and technical leads, applying the principles of prevention, problem solving and partnership working in all that you do. You will work flexibly across the directorate and its wide range of responsibilities and will be expected to manage and inspire others to achieve maximum impact.	£55,000 - £59,999	N/A	NIL	N/A	2
Data Collection Controller	To maintain and ensure that all the data associated with AO Civils Assets is maintained and fully populated in the London Underground asset management system; data complies with all relevant Engineering standards; ensure that all assets data is "fit for purpose" and fully meets the business requirements.	£55,000 - £59,999	N/A	NIL	N/A	0
Data Control Manager	The role holder is accountable for leading and managing access to all T&D systems across all roles through a Data Control team, ensuring overall accuracy and thorough control of system access. The role holder designs, establishes standards, reviews and manages all control processes and procedures within T&D which govern access to personal and customer data within TFL systems ensuring compliance to security standards, policies and regulations to protect TFL customer and employee data.	£55,000 - £59,999	N/A	NIL	N/A	0
Data Control Manager	The Data Control Manager enables the continuous improvement and development of project and programme integration. Applies extensive expertise of information management by ensuring information produced by projects / programme and the supply chain is of sufficient quality and accessible to those who need it, when they need it.
