

## Transforming your journey

### Newsletter 32 – May 2008

#### Northern Ticket Hall

Phase 2 of the underground station redevelopment will create additional capacity; provide better interchanges to the deep level tubes (Northern, Piccadilly and Victoria Line platforms) and deliver step-free access to all six underground lines served at King's Cross St. Pancras Underground station.

This phase involves construction of a new Northern Ticket Hall and associated pedestrian passageways, escalators, lifts and stairs directly to the deep level tube platforms.

Construction of the ticket hall is ongoing and works include ground excavation, the pouring of concrete to construct the floors and walls at all four levels, the erection of steelwork and framework and the construction of lift shafts within it.

Tunnelling work to create new passageways to the Piccadilly, Victoria and Northern Line platforms is complete with fit out of these tunnels due to commence shortly.

Extensive monitoring and testing of the tunnelling works continue in order to ensure that the buildings in the area, particularly those that are heritage listed, are not adversely affected.

Works to construct a new ventilation shaft on the western side of Kings Cross Station are also ongoing. Once complete this area will be handed over to Network Rail who will then begin their works in the area as part of the redevelopment of Kings Cross Station.

#### Line platform closures

There are no platform closures or possessions scheduled for the next quarterly period (May – July 2008).

If you require further information, the helpline will continue to operate on a 24-hour basis and can be reached on the number below.
